

Year 5 Geography Project

What makes someone an Earth Hero?

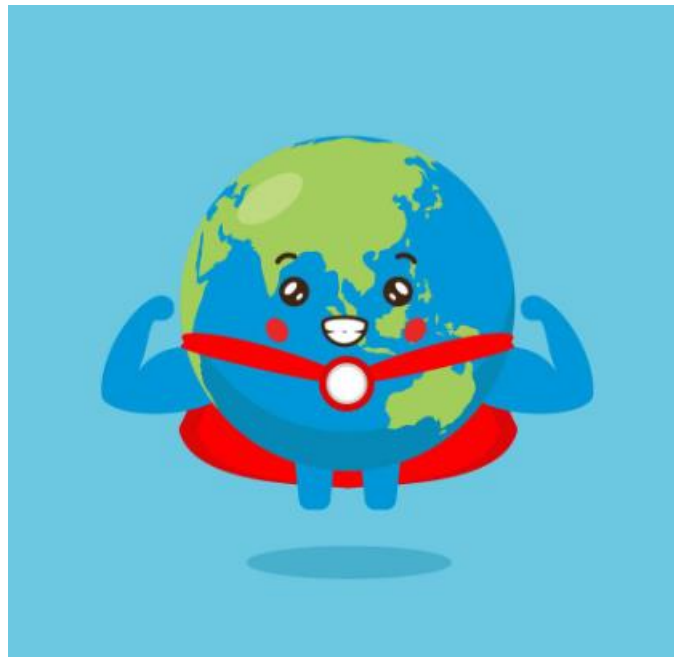

Your task is to create an invention to help our planet. This invention could make you an Earth Hero!

You may want to be creative and make a prototype of your invention, or you might choose to design a poster, leaflet or simply make a PowerPoint presentation.

Think creatively – use the questions opposite to help you structure your presentation.

How will you ensure what you present is clear and gives as much information as possible?

Presentation Day:

Thursday 15th

October

What is the name of your invention?

What does your invention look like?

What does your invention do?

How does your invention help save the planet?

Who will use your invention and why?

How will your invention improve life for others and enable them to live life in all its fullness?
