

Year 5 Space Project

Is it right to explore a place no human has ever been?

Your task is to create a poster or model that demonstrates some of your learning around our Space topic.

You may want to complete some research on a topic linked to Space that interests you. This could be linked to a particular planet, our solar system, space missions or the International Space Station (ISS), amongst many other ideas.

Presentation Day:

Tuesday 8th December

You will be sharing your poster or model with your class.

Think about the following things to make your project stand out:

- **How will you include your researched information?**
- **What will you do to make your project eye-catching?**
- **Can you incorporate a 3D element into your project?**
