

Homework task – Summer Term 2

Please bring in to school on Monday 13th July

This term's topic is looking at the question 'What makes a community flourish?' and we are hoping you are excited to get involved in our science topics!

If you are feeling creative, we would like you to design a new outdoor space for the whole school community to use in a shoebox. Please be creative with this task. You will need the following items:

- An old shoebox or cardboard box
- Craft materials (if you wish)
- Your own drawings
- Natural materials (optional)
- See if you can use household recyclables!

Each completed project will earn you dojo points and we are hoping to share the shoebox gardens at our celebration of learning event which is on **Tuesday 14th July at 3pm.**

We hope you want to take part and have fun with this project!
